Boarding & Layover

Equine Veterinary Hospital of Northern Indiana, PC keeps a limited number of stalls and paddocks available for board. There are multiple options available for turnout, types of feed and level of care. This is an excellent opportunity to have your horse professionally cared for and have access to our exceptional facility.

Our facility is conveniently located 5 miles south of US-20 and SR 331, making it an ideal spot for overnight layover for travelling horses. Our driveway is designed for horse trailers, making turnaround or overnight parking convenient and easy. Stalls and turnout are available for horses staying at our facility for layover.

For the safety of all the horses using our facility, a current negative Coggins (within the past 12 months) and proof of vaccination (flu/rhino) are required for all boarders, open riding and layover.

Please contact our office for more details or other questions regarding any of our non-veterinary equine services
